EDUCATION

Master in Data Science | 2nd Semester

August 2025 – Expected Graduation 2027

University of Colorado, Boulder – United States of America

Relevant Coursework: Data Mining, Statistical Analysis, Cybersecurity in Data Science.

Bachelor of Technology in Artificial Intelligence and Data Science | GPA: 8.60/10.00. (~3.4/4.0) August 2020 – May 2024

Vishwakarma Institute of Technology, Pune - India

Pune, India

Relevant Coursework: Data Mining and Knowledge Discovery, Business Intelligence and Analytics, Artificial Intelligence, Machine Learning, Cloud Technologies

TECHNICAL SKILLS

Programming Lang: Java, Python, SQL, JavaScript, SQL

Skills: Git, Aws, Postman

ML/DL Frameworks: Scikit-learn, TensorFlow, Keras, Prophet, Logistic Regression, Naïve Bayes, SVM, K-means

Databases: MySQL, MongoDB

WORK EXPERIENCE

ERPNext Full Stack Developer | Medsynaptic Pvt. Ltd

Jan 2025 – June 2025

- Designed and implemented software infrastructure for business process mapping and workflow automation.
- Implemented a RESTful API for internal project management tool, facilitating seamless data exchange between front-end application and a HeidiSQL database.
- Resulting in a 30% reduction in manual data entry and improved team collaboration.

Python Developer Intern | Medsynaptic Pvt. Ltd.

June 2024 – Dec 2024

- Developed HIS-PACS integration system to streamline hospital data transfer.
- Optimized DICOM data processing, improving retrieval speed by 30%.
- Implemented SQL query optimization, reducing report generation time by 40%.

PROJECT EXPERIENCE

Sentiment Analysis of Twitter Data on the Russia-Ukraine Conflict

Jan 2024 – April 2024

- Evaluated the predictive accuracy of five machine learning models, including Random Forest and SVC for web security vulnerability identification, informing selection of Random Forest for enhanced model precision.
- Built ML pipeline using Logistic Regression, Naïve Bayes, SVM.
- Achieved 87% accuracy using TF-IDF, outperforming BoW by 12%.
- Analyzed 500,000 tweets to identify sentiment trends & misinformation spread.

Crime Analysis and Crime Prediction of Toronto

August 2022 – Dec 2022

- Engineered a Python-based supervised machine learning model utilizing Random Forest and K-means clustering to forecast Toronto crime incidents, achieving 85% accuracy in predicting crime hotspots for the next year.
- Implemented Prophet forecasting, improving assault prediction accuracy by 15%.
- Mapped crime heatmaps using Folium & Tableau for visualization.

Audio Deepfake Detection using AI

July 2023 – Nov 2023

- Converted audio spectrograms into training data for a 3-layer CNN model.
- Achieved 78% accuracy using categorical cross-entropy loss & Adam optimizer.
- Improved fake audio detection by 20% over baseline methods.

PUBLICATIONS

Facial Emotion Based Song Recommendation System

April 2023

- (Conference: 2023 International Conference on Computational Intelligence and Sustainable Engineering Solutions (CISES))

Personalized travel recommendation system: Hybrid model based on ratings and image analysis.

Dec 2023

- 2nd Online International Conference On Artificial Intelligence And Sustainable Computing For Smart Cities: Ais2c2

CERTIFICATIONS

- Data Analyst (Internship and Training Program) by SHAPEAI
- Computer Vision by CHARUSAT
